Re: Drywall Services at Sandpointer Condominium, Seattle

Dear Bill,

The rains in May and a roof leak caused extensive water damage in my condominium. Peter Kirk came, assessed the damage, and gave me an accurate schedule of the time involved to complete the repairs. I am fortunate that Star Roofing contracted Ketchikan to do the restoration work. Pete coordinated the work for asbestos in the ceilings, new wallboard, and always responded to my inquiries during the installation. Your workmen did an exceptional job, and my place now looks pristine with no hint of the damage.

In addition to Pete, I want to commend the personnel in your employ. Roland Rubi is such an incredible, innovative man. He was always available and organized the schedule of work in tandem with Star Roofing to keep the work on track and the repairs done to the highest standards. Roland has continued to stay in touch and finish up all the remaining items. And besides being such a technician, he is sincere, and a really nice man!

Patty Vasquez is a treasure. She was encouraging, and really helpful to me personally. When the work was completed, she had my place spic and span and ready to occupy. It is comforting to have such professional workers one admires do the work in my home when the water damage seemed overwhelming.

I am very pleased with the work Ketchikan Drywall did in my condo, and am happy to give others a referral on the quality of your workmanship.

Yours truly,

Patricia Chiarelli
